

CABLE BLOW & FLOAT EQUIPMENT 3015

Sahlins hydraulic blowing equipment 3015 is designed to feed cables into the protecting duct in an efficient way. With this machine you can either blow or float.

The equipment works with a "push-pull" method, which means that the cable is pulled by the hydraulic feeder hitting the special designed "plug" which is mounted in the front of the cable, and at the same time pushed by the air driven feeders. This construction gives a safe installation in lengths up to several kilometers or more, (depending on the cable and the duct design).

TECHNICAL DATA

Length:	700 mm
Width:	330 mm
Height:	370 mm
Weight:	30 kg
Force :	max 2500 N at pmax 250 bar
Cable speed:	10-90m/min. (dep. on canalisation)
Cable dia:	8-31 mm
Duct tube dia:	25-60 mm
Air flow max:	15m ³ /min.
Air pressure max:	15 bar

BASIC EQUIPMENT

Art. no 3015-0000

Blowing equipment
Floating accessories
Storage box

Shoes for hose 32mm and 40 mm
Inlets 10-11mm, 11-12mm,
12-13mm, 13-15mm
and 15-17m.

Art.no 1010-100 Hydraulic power pack

Art.no 1010-0010 Hydraulic cable pack
