

WINCH 3300

The underground Cable Winch 3300 is a hydraulically operated 3 tonne winch with a variable pulling speed and force.

By having double capstan wheels, this winch differs from a drum winch as follows:

- Always the same uniform pulling force and speed no matter how much cable/rope there is on the collecting drum.
- Fixed input point, that is, no lateral wander of the cable/rope.
- No problems with winding up the cable. The winch features infinite control of speed and pulling force, both forwards and reverse.

TECHNICAL DATA

Pulling force:	Max 3000 kp.
Speed:	Max 55 m/min.
Engine:	Diesel engine, 28 hp
Wire:	Steel wire, 550 m, Δ 12 mm.

BASIC EQUIPMENT

3-ton winch.
Steel wire rope 12 mm, 500 m
Swivel
Cover.
Instruction book.
Art. No. 3300-0000
