

# DRUMSTANDS

## Aluminium drumstands

Sahlins aluminium lightweight drumstands with wheels are very easy to transport and set up. The large base plates make them very stable. The drumshaft is fitted with slide bearings for easy rotation. Aluminium spacers hold, and centre the drum on the shaft. The hydraulic jacks are equipped with hard chromium plated piston rods to prevent rust. Two sizes of the drumstand are available.

## Steel drumstands

Sahlins steel drumstands are completely galvanized and of a very rugged construction. The hydraulic jacks are equipped with hard chromium plated piston rods. Aluminium spacers centre and hold the drum on the shaft.

A drumshaft diam. 60mm with slide bearings is also available.
